Number To Know...5,000,000

by

\$5m is how much Novo Nordisk has invested in bionic pancreas developer, Beta Bionics.

\$5m is the amount of cash Novo Nordisk has pumped into Beta Bionics as part of a strategic partnership between the two companies to develop a bionic pancreas that will be compatible with the drug maker's NovoLog insulins. Beta's iLet bionic pancreas is designed for automated delivery of insulin alone and insulin and glucagon, and incorporates Dexcom's continuous glucose monitoring technology and smart algorithm). Beta last year also received a \$5m investment from another major insulin drug maker, Eli Lilly.
