Number To Know...5

by

Five years ago, BoneSupport signed on Biomet – now Zimmer Biomet – as the exclusive US distributor of its Cerament bone substitute product. The two companies have decided to renew and extend the partnership.

Swedish specialist in injectable bone substitute materials [BoneSupport AB](#) succeeded in getting big ortho player Biomet on board, five years ago in 2012, as its US distribution partner for its *Cerament* bone void filler. On Mar. 14, the companies – Biomet now having merged with Zimmer – announced they will be extending this partnership. Cerament is approved for orthopedic, trauma and foot and ankle indications. BoneSupport also has Cerament G, a bone void filler that elutes the antibiotic gentamicin, and Cerament V, which elutes vancomycin, which are CE marked but not yet approved in the US.
