QUOTED. May 18, 2018. William Abraham.

by

Results of a study showed that Impulse Dynamics' *Optimizer* device significantly improved exercise tolerance and quality of life in certain heart-failure patients. See what principal investigator (and cardiologist) William Abraham of Ohio State University said about those patients here.

"This is really a population in which few, if any, evidence-based therapies exist, so the potential here for CCM-utilization in this population is, appropriately, quite high." –William Abraham, cardiologist, University Wexner Medical Center
