QUOTED. Sept. 12, 2018. Steve Parker.

by

Creavo Medical Technologies is trying to make "magnetocardiography" a go-to tool for emergency departments in diagnosing heart disease. See what Creavo CEO Steve Parker had to say about evidence backing the technology.

"There's a very large body of clinical evidence to show that magnetic fields have diagnostic capabilities and far more diagnostic information than traditional ECGs." –Steve Parker, CEO, Creavo Medical Technologies
