## QUOTED. March 27, 2019. Boris Schmidt.

by

CardioFocus' *HeartLight X3* endoscopic laser ablation system recently won a CE mark based on results of a 60-patient trial showing the device consistently achieves pulmonary vein isolation in as few as three minutes for a single vein, among other accomplishments. See what primary investigator Boris Schmidt from Cardioangiologisches Centrum Bethanien said about the HeartLight X3 here.

"Our clinical results using the *HeartLight X3* System have been outstanding, with unprecedented treatment speed and precise lesion creation. Based on our experience with the device, we feel confident that the HeartLight X3 System is poised to change the way AFib ablation is performed in Europe." –Boris Schmidt, primary investigator, Cardioangiologisches Centrum Bethanien
