QUOTED. April 22, 2019. Frans van Houten.

by

Philips' CEO Frans van Houten spoke about his vision for the company's continued adoption of machine learning and artificial intelligence at the World Medical Innovation Forum in Boston. See what van Houten said about it here.

“Unless it’s embedded in the workflow of the clinicians and the nurses and part of the discharge process it won’t get adopted.” –Frans van Houten, CEO, Philips
