QUOTED. 15 May 2019. Ron Silverman.

by

The US FDA has granted KCI Medical Services' de novo request for its Prevena incision management system, making it the first disposable negative pressure system designed specifically for the management of closed surgical incisions available in the US. See what KCI Chief Medical Officer Ron Silverman said about it here.

"The FDA's historic decision to grant this indication speaks to the power of the clinical evidence." – Ron Silverman, chief medical officer, KCI Medical Services
