QUOTED. 17 September 2019. Ardy Arianpour.

by

Seqster developed a technology platform that integrates data from electronic medical records, DNA and genomic information and fitness wearables into one place. See what Seqster's CEO, Ardy Arianpour, said about it here.

"We accidentally fell on the story of interoperability, a \$30bn-plus annual problem that we are now leading the effort [to fix]." – Ardy Arianpour, CEO, Seqster
