QUOTED. 20 January 2020. Henrik Berggren.

by

San Francisco-based digital health start-up Steady Health has launched the first "virtual" full-service diabetes clinic for patients in California. See what Henrik Berggren, CEO and founder of Steady Health, said about it here.

"By building our model on continuous data through CGM, we give our patients much more precise advice on diet, medication, exercise and lifestyle factors. This drives up adherence and produces better results." – Henrik Berggren, CEO, Steady Health
