QUOTED. 31 March 2020. US FDA.

by

The US FDA published on 29 March an emergency temporary guidance that relaxes oversight of certain sterilizers, disinfectant devices and air purifiers intended to kill the SARS-CoV-2 virus. See what the agency said about it [here](#).

“FDA believes that certain sterilizers, disinfectant devices and air purifiers falling within the scope of this guidance may help reduce this risk of viral exposure based on our current understanding of these devices and SARS-CoV-2.” – US FDA
