QUOTED. 22 April 2020. Adam Schechter.

by

LabCorp has been given permission by US regulators to market its COVID-19 RT-PCR Test for home use. The test will be available in most states within the next few weeks. See what LabCorp's CEO Adam Schechter said about the company's test here.

“Our at-home collection kits are designed to make it easier and safer to test health care workers and first responders during this important time.” – Adam Schechter, CEO, LabCorp
