## QUOTED. 12 October. Srinivas Prasad.

by

An expert panel of neurosurgeons discussed new technological advances in spine surgery and the future of robotic spine surgery. See what neurosurgeon from the Jefferson University Hospitals, Srinivas Prasad, said about it here.

“What we are trying to do is to find the most effective technique for achieving the goals in that patient – minimizing morbidity without compromising effectiveness and finding something that is efficient and works well for the surgeon.” – Srinivas Prasad, neurosurgeon, Jefferson University Hospitals
