QUOTED. 21 October. Darla Hutton.

by

An expert panel at the virtual HLTH conference discussed the role of robotics in improving health and wellness in the health continuum. See what Darla Hutton, vice president of US marketing and customer hospital analytics at Intuitive Surgical, said about the future of robotics.

“As we enter this new era, I think a deep enterprise collaboration is going to be required. Trust is going to be required.” – Darla Hutton, vice president US marketing and customer hospital analytics, Intuitive Surgical
